X-Tek Group Introduces New Revolution X-ray System with CT/Metrology Capability

The X-Tek Group, leading global supplier of state of the art Real Time MicroFocus X-Ray systems announces the addition of Computerized Tomography / Metrology capability to enhance the industry best Revolution system.

Computerized Tomography produces high-resolution 3D data sets which can be viewed at any angle, sliced in any direction and measured, enabling detailed analysis of the internal structure of a wide range of components and objects. The power of true 3D imaging is now available, affordable, and simple to use.

Further, the Revolution features true concentric imaging, the highest degree of off axis tilt available, and NanoTech open tube technology for unparalleled resolution and magnification. The Revolution offers powerful solutions that solve inspection challenges with a simple click of a mouse.

About X-Tek Group, Inc

X-Tek is the premier manufacturer of real-time microfocus x-ray inspection equipment and high-resolution vacuum de-mountable x-ray sources. Its range of high quality microfocus x-ray systems offers high resolution, high-power, low maintenance and low cost of ownership. The X-Tek product range includes low cost bench-top systems, suitable for lightweight components, up to larger units with more complex functions, useful for inspecting electronic assemblies or engineering components in great detail. X-Tek maintains a worldwide agent network and has a rapidly expanding international user base with installations throughout Asia, the USA and Western Europe. Major multinational companies using X-Tek equipment include AMD, Ericsson, Texas Instruments, IBM, Motorola and ASAT.

X-Tek real-time microfocus x-ray inspection equipment is used in a wide range of applications including: Electronics, Semiconductor Packaging, Non Destructive Testing, Pharmaceutical, Medical Research, Automotive, Aerospace, Nuclear, Construction, Ceramics, Composites, Food, Defense and Security.
